

Setting Up DVSwitch on Android (not available for iOS)

1. An allstarlink.org login is required. If you don't have one, you can sign up on <https://allstarlink.org/>
Use your callsign and make note of the password, it will be needed later.
2. Install DVSwitch from the Google Play store.
<https://play.google.com/store/apps/details?id=org.dvswitch>
3. On the DVSwitch Dialer screen, press the **More** button.

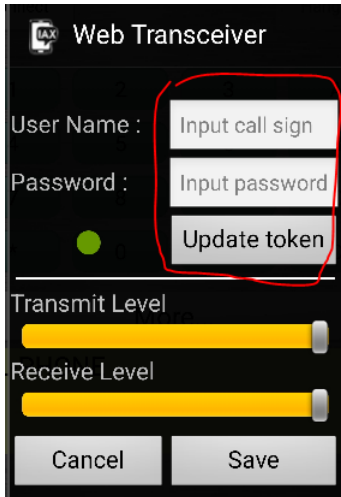

4. On the popup, touch **AllstarLink**

5. Next, touch **WT Setup**

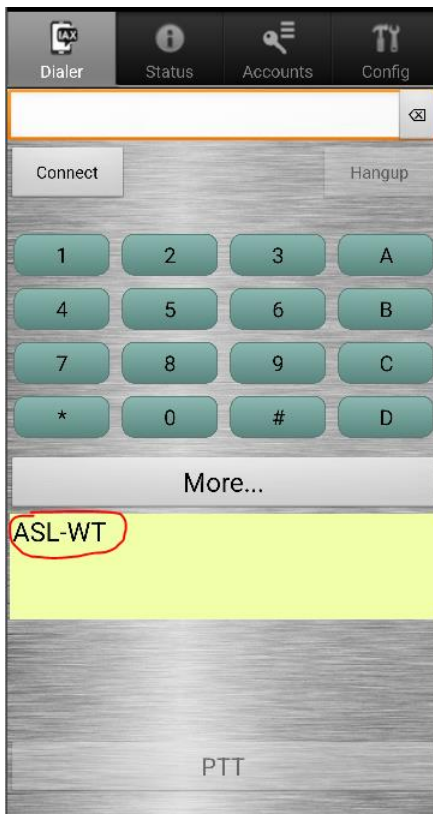

6. Enter your callsign and password, then touch **Update token**.

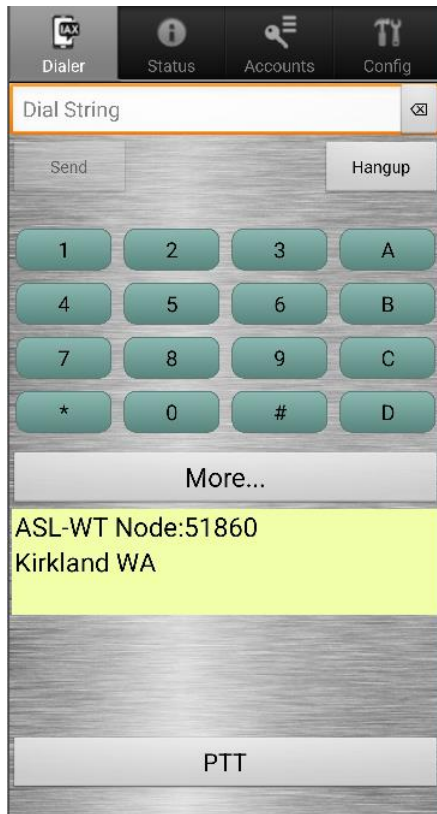

7. DVSwitch should respond with a message that the login was successful. Touch the **Save** button.

8. The Dialer screen should show **ASL-WT** mode.

9. If not, touch the **More** button, then touch **AllstarLink**, then touch **Enter WT Mode**.

10. DVSwitch is now ready to connect to an Allstar node. On the top of the Dialer screen, enter the node number. For the LWHC node, enter 51860, and touch the **Connect** button. If all goes well, the Dialer screen will look like this:

11. Note that the PTT button is now enabled. Hold the PTT button to transmit, release to stop.
